

EDEN GREENHOUSE DOME – UNITED KINGDOM

The Eden Greenhouse Dome is a botanical, biological theme park in St. Austel. It is the biggest greenhouse in Europe for plants and insects from tropical countries. The constant heat and humidity were the reasons for choosing hot-dip and ZINGA instead of conventional paint systems. Opening date: 01/06/2001.

For aesthetic reasons, ZINGA was overcoated with a vinyl aluminium paint.

ZINGA was used to repair the hot-dip galvanising layer (damaged during transport and assembling).

System:

ZINGA

1 x 60 μ m

Vinyl Aluminium Paint
