

LAMU PORT – REBARS – KENYA

The Kenya Lamu Port is the gate way for Southern Sudan - Ethiopia Transport Corridor (LAPSSET). This is also known as the Lamu Corridor. It is a transport and infrastructure project in Kenya that, when completed, will be the country's second Transport Corridor. Kenya's other transport corridor is the Kenya Mombasa Port which connects Uganda, Rwanda, Burundi, Sudan and other landlocked countries through Nairobi to the coast of Kenya.

At this point, about 3T ZINGA has been applied in 40µm DFT on 350T of rebars.
