

CULVERTS – ARMCO – FRANCE-FINLAND-NORWAY

ALTENA - ARMCO is a Dutch manufacturer of corrugated steel products.

The corrugated steel is mainly used for the construction of road culverts.

These are under-road tubes that are specially designed to allow flow water under roads, or to allow animals to pass.

These **ARMCO** culverts are sold worldwide.

Some culverts in France, Finland and Norway have been protected with **ZINGA**.
