

## INSULATORS – RWE AG – GERMANY

Since 1990 **ZINGA** is being applied on insulator carriers on high tension pylons of the electricity company **RWE AG (= Rheinisch-Westfälische Elektrizitäts Aktien Gesellschaft)**.

In the fall of 2004 another 10.000 insulator carriers on high tension pylons have been protected with **ZINGA** by the applicator **MUND**.

**ZINGA** has been applied by means of an airless spraygun in 2 layers of 60 µm DFT.

System:  
Surface preparation:  
SA 2,5 and Rz 50-70µm  
ZINGA 2 x 60 µm DFT
