

WATER STORAGE TANK IN FIRE FIGHTING SYSTEM - MYANMAR

In 2014, a water storage tank in a fire fighting system was coated for **Japan Tobacco Factory** in Yangon, Myanmar.

For the inside coating, HDG was prescribed.
However, after assessment, **ZINGA** was chosen at a layer thickness of 2 x 60 µm DFT.
The tank contains over 330 m³ of water (33.000 L).

The outside has been coated with an Epoxy primer and an Aluminium Topcoat.

*Right: inside treated tank
