

## WILCO TRUCK & TRAILER FRAMES – HØNEFOSS – NORWAY

The **WILCO** Company (Mr. Nils HAFNOR) in Hønefoss , Norway, is making truck & trailer frames. All year long Norway and the other Scandinavian countries can be hit by very cold winters (but also by very hot summers) and they use a lot of road salt in the winter season. This is why they are using ZINGA as their basic corrosion protection since many years.

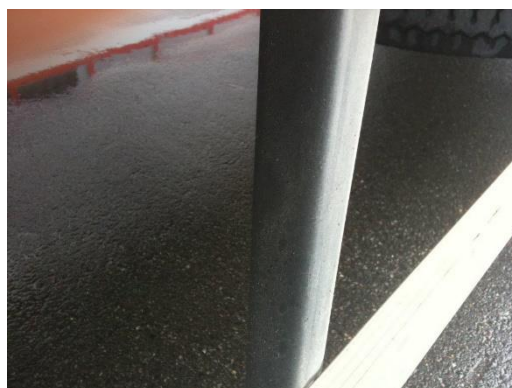

Below you will view some photos of th e extraordinary behaviour of ZINGA in this harsh region.

These rusted brackets were not protected with **ZINGA**

**ZINGA** was used in 2007 for this frame. These pictures were taken in 2018.

### System:

Surface preparation:	Blasting to SA 2,5
ZINGA	1 x 60 µm DFT
Topcoat (different brands)	2 x 100 µm DFT

This frame was built in December 2010. These pictures were taken **10 years after**, in October 2020, after having traveled 1,000,000 km ! (the heavy rusted parts are with a traditional paint system.)
