

BRIDGE – TEMVAR BRASOU – ROMANIA

In January 2011, **ZINGA** was used to protect a bridge (constructed in Romania) used to support water pipelines for the mining company **CARMEUSE** in Aisemont, Belgium.

In total 650 kg of **ZINGA** were consumed.

120µm DFT in 2 coats of each 60µm DFT were applied by airless spray gun.

System:
Gritblasting SA 2,5 and Rz 50-70µm
ZINGA 2 x 60 µm DFT
