Here is a list of Firms that Solely use ZINGA and it's associated products for work being carried out on London Underground sites. Their combined usage varies each month, but is constant. We as a company are the only specified product allowed for galvanising in the London Underground. As a matter of interest ZINGA has been specified for use in the Kensington Palace, Princess Diana's Official residence.

London Underground - Contractors

London Underground Limited.

Tarmac Montcocol Joint Venture - Jubilee Line extension (London).

Seele (UK) Ltd - Bermondsey Underground Station, London.

Balfour Beatty / AMEC - Jubilee Line, London (A very large project some £1.5 Billion pounds).

(Tarmac, AMEC and Balfour Beatty are very very large British Companies)

They are regular purchasers based on the technical information attained through rigorous scientific tests associated with the British Board of Agreement Certification procedures.
