Athelstane Water Reservoir – Rockhampton, Australia

The new roof installed on the **Athelstane Range Reservoir** In Rockhampton, belonging to **FITZROY WATER**, required approx. 500 cleats to be welded to the existing HDG frame to support the new structure. **ZINGA** provided a method to enable equivalent protection to be applied in-situ. The whole project was entrusted to **SWADLING PAINTS**.

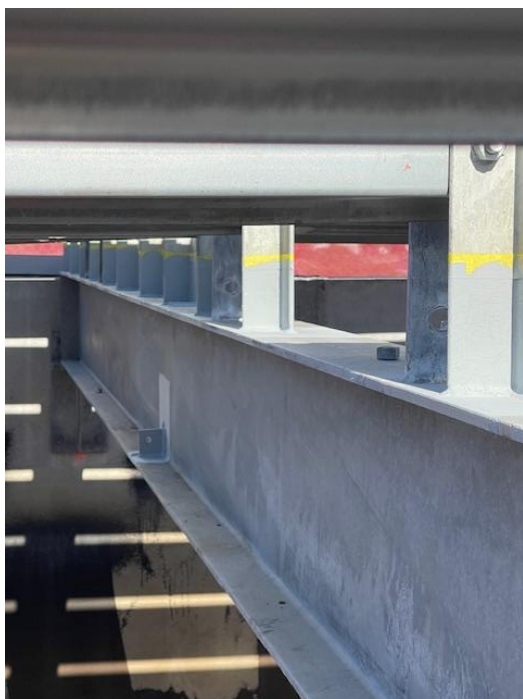

The project was completed in July 2024.

ZINGA has AS4020 approval for contact with potable water.

System:

Surface preparation: Bristle Blaster
ZINGA 75 µm DFT (by brush)
