Motor Yacht ABLE ONE – North Yorkshire, UK

The "Able One," a motor yacht built by **Parkol Marine** in 2015, is the 87th steel-hulled vessel in the UK to be "Zinganised.". To ensure the perfect cathodic protection system for its operations in the Mediterranean Sea, the owners were advised to pair the **ZINGA** liquid-applied anode with aluminium block anodes.

This innovative coating system, combined with high-standard blast-cleaning and specialized sealers, ensures the vessel remains corrosion-free for at least 20 years, even in harsh saltwater environments. The project also highlights **ZINGA** unique ability to protect aluminum components, effectively equalizing electrical potentials across the ship's diverse metal structures.

The Able One is still in excellent condition.

ZINGA®
Asset integrity for eternity.

Official launch: October 2015

Drydock in 2019 – Malta

Drydock in 2022 – Croatia

Systems:

- Surface preparation: Blasting to SA 2.5
- Bottom & UW Hull: ZINGA 60-80µm + ZINGATARFREE 2 x 90µm DFT + antifouling
- Topsides & other areas: ZINGA 60-80µm + ZINGACERAM HS 120 µm DFT + topcoat
