International Airport JEAN LESAGE – Québec, CANADA

The **region of Québec City** has an airport of international class, offering experience of superior quality in a secure environment.
ZINGA was applied in 2009 on the welding seams to uniformize the galvanic protection of the different kinds of steel and afterwards ALU ZM was applied on the entire structure.

During application of ZINGA

Structure preparation SSPC SP-7:
ALU ZM 2 x 40 µm DFT

ZINGA in August 2017

ZINGA in August 2017

Bruno SAVERYS, CEO of ZINGAMETALL Belgium, was in this airport in August 2017 and took these 2 pictures, 8 years after the ZINGA application.
He has not seen a single rust spot.

17 years later, on October 27, 2026, Bruno SAVERYS, Chairman of ZINGAMETALL Belgium, was on-site and took the following photographs.
No defects were observed on the terminal entrance structures.

With the kind cooperation of GALVANISATION ZINGA Québec, Distributor of ZINGA in Eastern Canada.
